## COMPANY SNAPSHOT

Studio A International, LLC is a Columbus, Ohio-based small business providing architectural design, BIM/Revit support, and custom AEC software automation services. Founded in 2006 by Adrian L. Crisan, Registered Architect, NCARB, the firm supports public, institutional, commercial, aviation, military-related, industrial, and facility improvement projects.

We help agencies, owners, and prime contractors improve project delivery through accurate documentation, BIM coordination, Revit production support, and internally developed automation tools.

## CORE COMPETENCIES

### Architectural Design Services

Commercial, institutional, industrial, aviation, military-related, residential, renovation, tenant improvement, and facility support projects.

### BIM / Revit Support

Revit production, BIM documentation, model setup, sheet/view workflows, standards support, Navisworks coordination, and Revit training.

### AEC Software Automation

Custom Revit add-ins, BIM automation tools, SQL-connected project databases, workflow automation, QA/QC tools, dashboards, and custom applications for AEC teams.

### Project Documentation Support

Permit drawings, construction documents, existing condition documentation, drawing production support, and project-based support for larger organizations.

## PAST PERFORMANCE

Advanced Logistic Facility - Columbus, OH  
Ingram Event Center Addition - Columbus, OH  
Family Shelter - Columbus, OH

### Representative Prior Experience of Principal:

Guangzhou International Airport - Guangzhou, China  
John Glenn Columbus International Airport - Columbus, OH  
Levine Children's Hospital - Charlotte, NC  
Dell Children's Medical Center - Austin, TX  
U.S. Army Reserve Center - Ogden, UT  
University of Miami Biomedical Research Center - Miami, FL

## DIFFERENTIATORS

### Architecture + BIM + Software in One Firm

Licensed architectural experience combined with BIM production and custom software development.

### Principal-Led Small Business

Direct communication, responsive support, flexible teaming, and efficient execution for task orders and project-based workloads.

### Technology-Driven Delivery

In-house automation tools help reduce repetitive work, improve drawing consistency, organize project data, and reduce documentation errors.

### Broad Facility Experience

Experience includes commercial, aviation, military-related, healthcare, research, logistics, residential, institutional, and public-sector project types.
